

```

public class Home extends Controller
{
    public static void index()
    {
        User user = Accounts.getLoggedInUser();
        render(user);
    }
}

```

Conventional Template Includes

```

#{extends 'main.html' /}
#{set title:'Home' /}
#{mainmenu id:"home"/}

<h1 class="ui inverted teal block header" >${user.firstName} ${user.lastName}</h1>
<section class="ui two column grid segment">
    <div class="row">
        <div class="ui column">
            #{include "components/friends.html" /}
        </div>
        <div class="column">
            #{include "components/messages.html" /}
        </div>
    </div>
    <div class="row">
        <div class="column">
            #{statusupdate route:"/home/changestatus", status:"${user.statusText}" /}
        </div>
        <div class="column">
            #{profileimage route:"/home/uploadpicture/${user.id}", image:"/profile/getpicture/${user.id}" /}
        </div>
    </div>
</section>

```

```

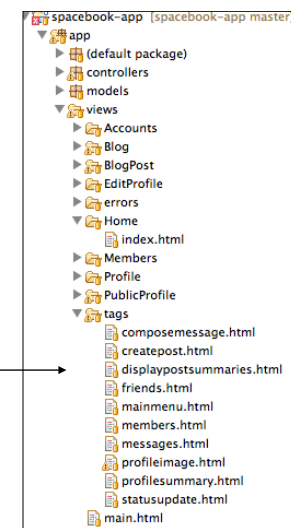

<section class="ui stacked segment">
    <h4 class="ui inverted blue block header">Messages</h4>
    #{if user.inbox.size() > 0}
    <table class="ui table segment">
        <thead>
            <tr>
                <th>From</th>
                <th></th>
                <th>Message</th>
            </tr>
        </thead>
        <tbody>
            #{list items:user.inbox, as:'message'}
            <tr>
                <td>
                    <div class="ui small image">
                        
                    </div>
                </td>
                <td>
